

On-Demand: IT Staffing

Client

Trover Solutions, Inc. is a leading independent provider of outsourced insurance subrogation, claims recovery and cost containment solutions for the healthcare Payor and property and casualty industries. It is headquartered in Louisville, Kentucky.

Technologies Used

Oracle, Business Objects

Benefits

» On-Demand IT Staffing without taking on permanent employees reducing costs to the company

Project Description

An already busy IT department reaches out for additional contract IT support as needed to meet existing and business growth challenges.

Business Challenges

Trover's needs change quickly as new clients are landed. The volumes of claims data are tremendous and the IT staff needs to be added as needed with these operational needs without bringing on fulltime equivalents (FTE's)

Solutions

- » V-Soft has provided onsite resources from its bench, by recruiting using its ATS (Applicant Tracking System) and by posting to network portals.
- » V-Soft also provided remote resources as needed.
- » V-Soft recently placed the contract resources in less than a week and during our business relationship have placed over 25 resources with Trover.
